* Documentation under commercial limited trial (including mandatory organisational data).

** During the execution of the analysis, online materials, including their website, were no longer available.

*** Excluded at this stage as it was described in app marketplaces as an Ethereum wallet to manage crypto assets.

**** Required setting up a local environment and creating an admin account on their remote API, but the authentication flow failed due to an error that prevented saving the necessary verifiable credential (VC) with the transponder app.

YAML = "You Might Also Like" (App Store) or "Similar apps" (Play Store).
